He emphasized that the allocation of funds in DIPA is the highest expenditure limit and should not be exceeded without sufficient funds.

Furthermore, implementing activities and using the budget on DIPA, which results in state expenditure, is carried out through commitment making (Binding). The commitment form is an agreement/contract for the procurement of goods/services in the

form of proof of purchase/payment, receipts, work orders, agreement letters, and order letters. Another form of commitment is stipulating decisions in decrees, orders, letters of assignment, statement letters, and official travel letters.

Furthermore, Fajar Wibowo explained that bills submitted to the state must be based on commitments and valid evidence to obtain payment, including work performance, list of payees, completion of tax obligations, and other requirements. Bill payment methods used include direct payment (LS) and supply money (UP), which consists of cash supply money and

supply money through Government Credit Cards (KKP).

Concluding the seminar, the Prime Secretary of Lemhannas RI, Police Commissioner General Drs. R.Z. Panca Putra, M.Si., emphasized the importance of mastering the budget absorption mechanism. He hoped this workshop would improve the governance and budget absorption in Lemhannas RI. peer review, a vital element to achieve level 3 in the Internal Audit Capability Model (IA-CM).

Sunarwan explained that the Quality Assurance and Improvement Program (QAIP)'s objective is to ensure that internal supervision conforms to the definition and standards of internal supervision and applies the auditor's code of ethics. In addition, this program aims to improve the efficiency and effectiveness of internal control and identify opportunities for improvement.

"External peer review is a fundamental factor in maintaining and improving the quality and effectiveness of APIP internal control," Sunarwan said. This was the first time an external peer review had been conducted within Lemhannas, RI. Preparations that have been made included the peer review assessment process,

**JAKARTA** - Socialization of Output Cost Standards T.A. 2025 at Lemhannas RI

Lemhannas RI held a Budgeting Socialization for Fiscal Year (T.A.) 2024 with the theme "T.A. Output Cost Standards. 2025" on Friday (17/5), in the Syailendra Room, Astagatra Building, 3rd Floor, Lemhannas RI. This event was opened by the Head of the Planning Bureau of the National Secretariat of Lemhannas RI, Admiral TNI Trismawan Djonisajoko, S.E., M.M., M.Tr.Opsla.

This activity was attended by Young Expert Budget Analysts from the Sub-directorate of Cost Standards, Directorate of Budgeting Systems, Directorate General of Budget, Ministry of Finance of the Republic of Indonesia, Tata Suharta, S.E., Ak., who acted as resource persons. In his presentation, Tata Suharta emphasized the importance of the Output Cost Standards policy in

supporting the cost standards that will be issued by all ministries and institutions. "Because we understand that we are in the public sector whose problem is that the money is not from our own business, but from state revenues from taxation," he said.

Tata Suharta explained that because the source of money comes from state revenues, public sector financial affairs focus more on expediency rather than profit. Output Cost Standards were created to ensure that the costs incurred by the government are commensurate with the benefits produced.

Furthermore, it is explained that output cost standards consist of two types: General Output Cost Standards (SBKU) which apply to several or all ministries/institutions, and Special Output Cost Standards (SBKK) which apply only to one ministry/institution. Tata Suharta also explains the benefits of output cost

standards which aim to improve the quality of planning, speed up the preparation and review of Ministry/ Agency Work Plans and Budgets (RKA-K/L), and facilitate the implementation of monitoring and evaluation in achieving output.

He added that proposals for output cost standards could come from the relevant ministries/institutions or from the Ministry of Finance through the Directorate General of Budget. "The ultimate goal is to achieve efficiency into quality shopping," stressed Tata Suharta. Quality shopping here does not mean costs that are too low, but how reasonable spending can produce maximum benefits.

This socialization is a step by Lemhannas RI to ensure that budgeting in the coming year is more efficient and accountable, in line with standard cost policies which aim to improve the quality of state spending for optimal public benefit.
